

The Task:

- Allow Signed in Users to View all of Their Bookmarked Posts

is dependent on:

- Allow Signed in Users to Bookmark a Post

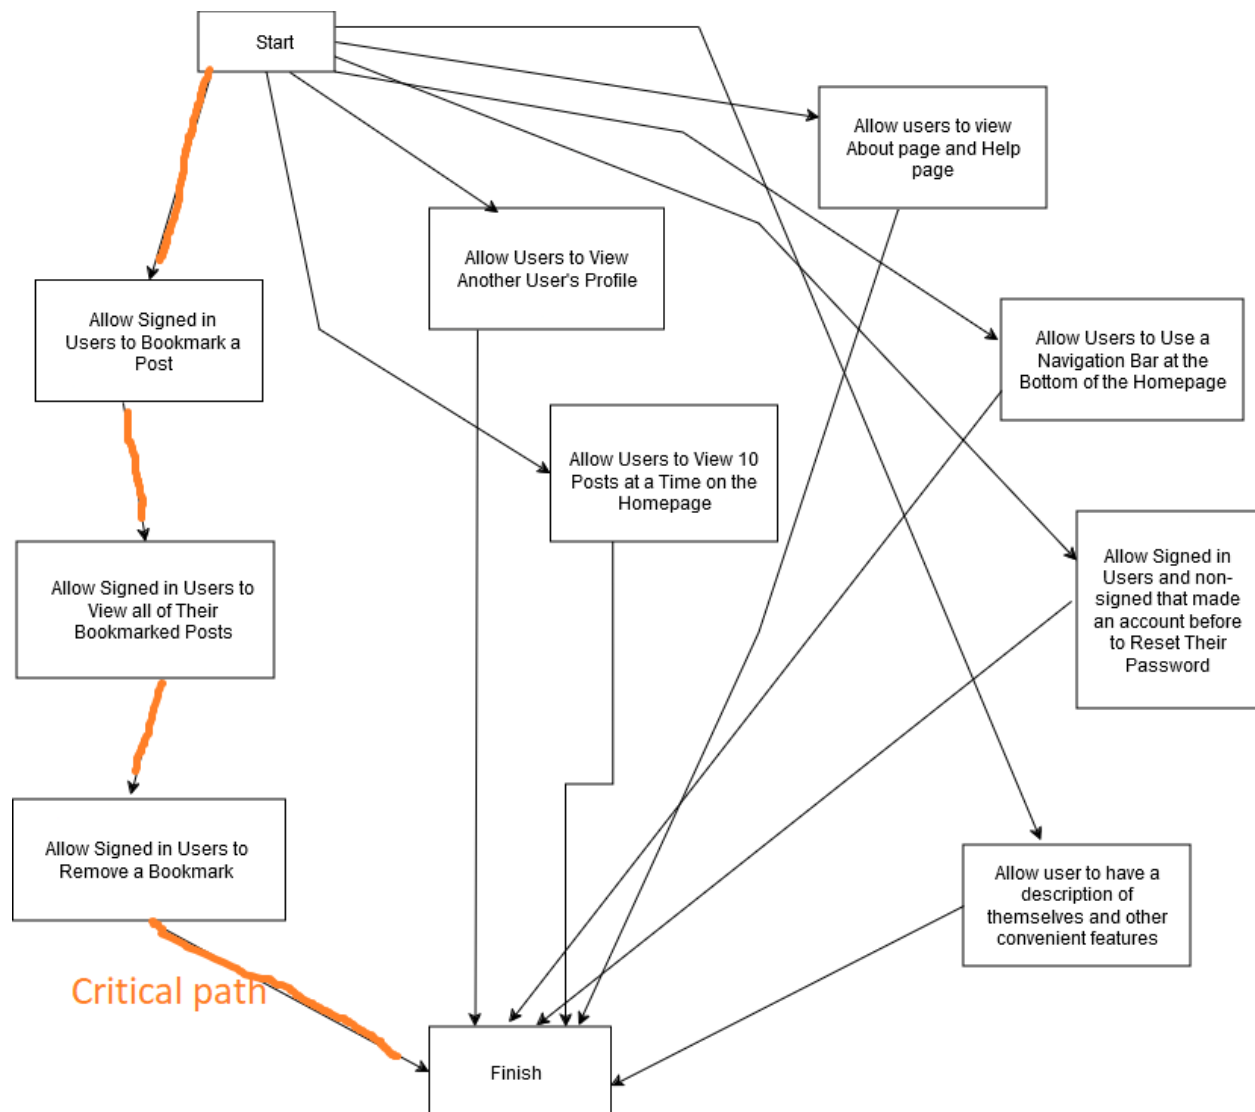

While Task:

- Allow Signed in Users to Remove a Bookmark

is dependent on:

- Allow Signed in Users to View all of Their Bookmarked Posts

The critical path is therefore as follows:

In this concluding sprint, we have most of our features implemented independently because they are mostly convenient features for the clients. This sprint we only have 1 critical path, and we decided to give 1 member 2 features, and after they finished their features, they communicated immediately to the teammate responsible for the next feature. For other features, they are implemented independently and do not require any wait time. After a member finished their task, they would notify everyone in the group to keep track of the team's progress.
